

CO-OP

CALGARY CO-OP PHARMACY SPECIALTY HUB

HOW CAN WE HELP?

Timely Initiation of Biologic/ Specialty Medications

We will work collaboratively with insurers and Patient Support Programs to ensure insurance coverage is processed as quickly as possible.

Reduce Clinic Workload

The HUB will complete all special authorization and insurance forms. Physician signature will be required on the authorization form. We will also initiate reminders and complete forms for special authorization renewals.

Improved Quality of Care

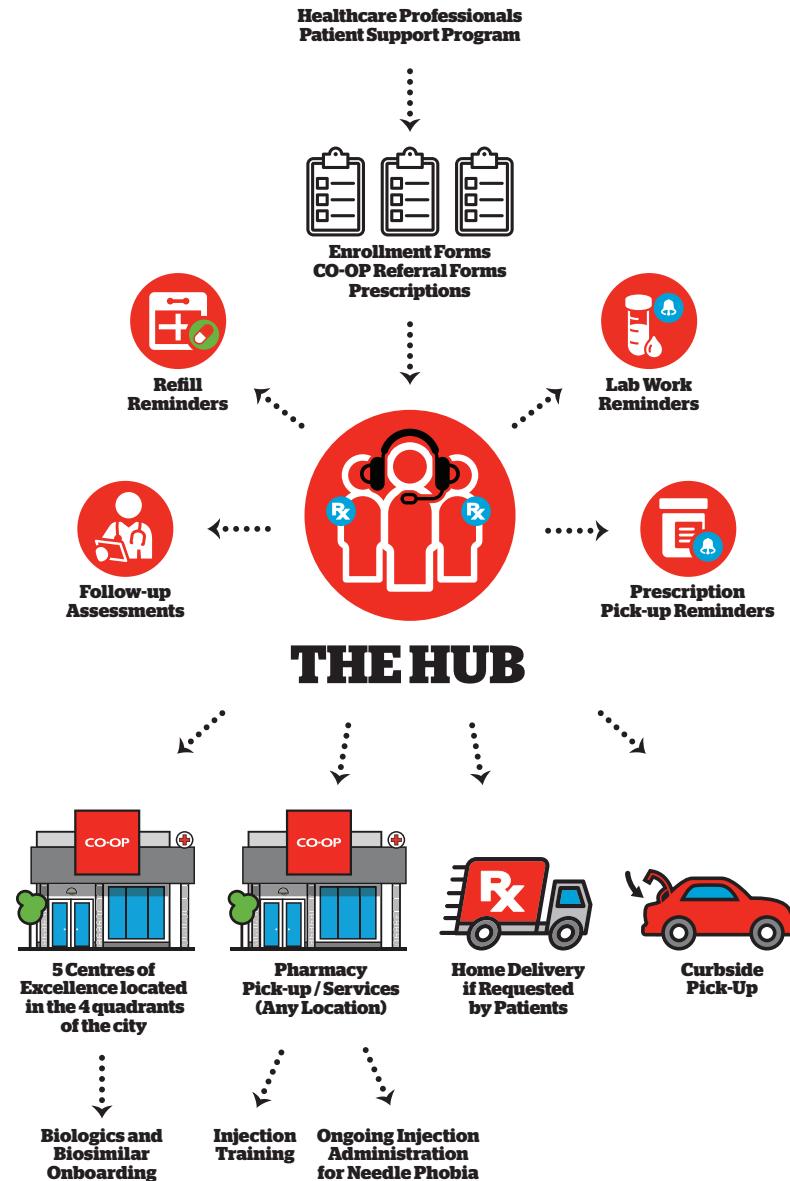

The HUB will follow up with the patient regularly to monitor for efficacy, safety, and compliance. We will communicate concerns with physicians.

Vaccination Support

Our prescribing pharmacists are able to assess, prescribe and inject adult vaccinations based on guidelines and medication requirements.

HOW ARE WE DIFFERENT?
