

CALGARY CO-OP

CALGARY CO-OP PHARMACY HUB

HOW CAN WE HELP?

Timely Initiation of Biologic/ Specialty Medications

We will work collaboratively with insurers and Patient Support Programs to ensure insurance coverage is processed as quickly as possible and work with the PSP to coordinate ongoing renewals.

On-Boarding Appointment

We will train on the new injection device, reinforce disease and treatment goals as per the prescribing physician and provide a 24-hour post-injection follow-up phone-call

On-Going Injections

If the patient is not comfortable with self-injection, we will book a training session before the next dose or on-going injections will be offered at no charge at any of our 23 locations.

TB Testing

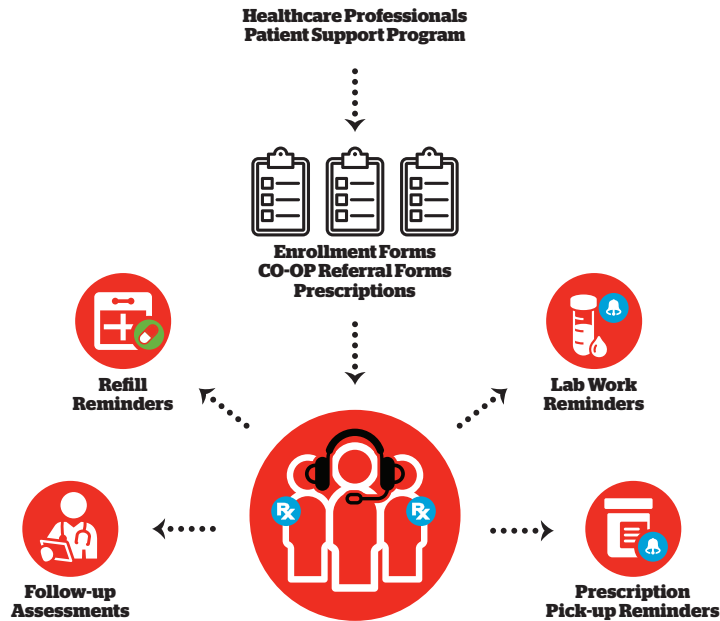

Available at multiple locations within Calgary, Strathmore, Airdrie and High River

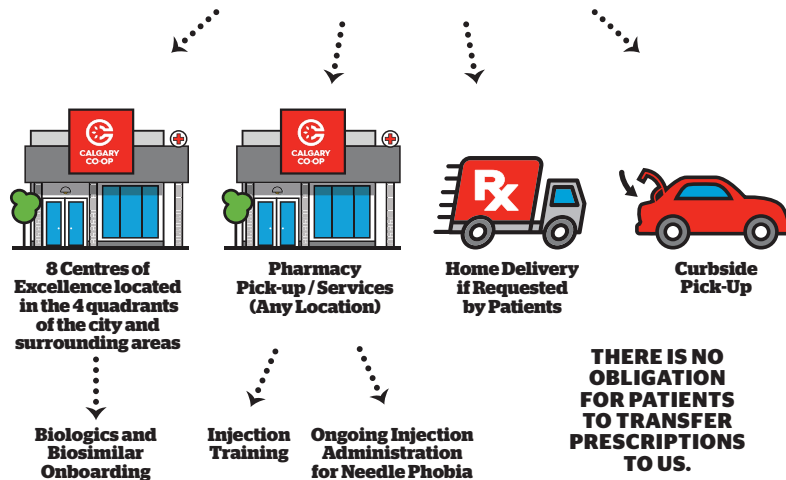

Vaccination Support

Our prescribing pharmacists are able to assess, prescribe and inject adult vaccinations based on guidelines and medication requirements.
